

# Signs Your Air Compressor Needs Service

---

## Run time of 2,000 hours or the calendar

Get service annually or every 2,000 run-time hours, whichever comes first.

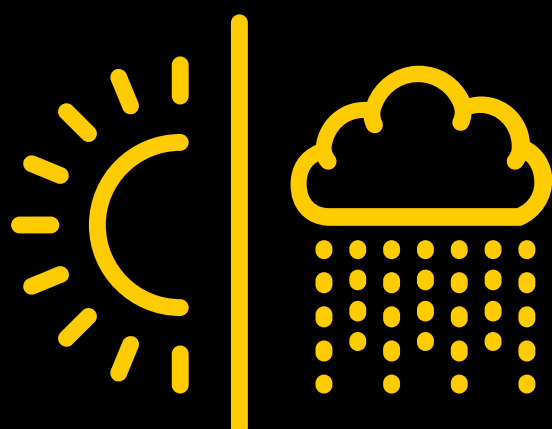

## Extreme plant conditions

Dirty, dusty, or other poor environments impact compressors, requiring more frequent maintenance.

## Extreme weather

Extreme cold or heat can do a number on your air compressor. Ensure it's ready for summer and winter.

## Need to save money or energy

You may be able to get more out of your current setup. Instead, consider an audit. It's cheaper than buying a new air compressor, too.

## Compressed Air Technologies

We're Tri-state's leader in compressed air. Let us help you with preventive maintenance and audits.
